About me

I'm a DevOps engineer with 5++ years of hands-on experience with a decent amount of tools. My main focus is Kubernetes and CI/CD.

I've got some beliefs that should be capable of describing myself

- One should tend not to repeat oneself
- One should never edit what's constantly generated
- One should aim for lesser amount of work with a bigger outcome
- Unless something is in CI, it doesn't exist
- Human factor must be avoided when possible
- Any routine must be automated, because it's error-prone
